

# CLEAN, COOL, AND DRY

Lubricant analysis helps assess both machine and lubricant condition. To be effective, a strategic lubrication program should have four simple objectives:

1. Choose the right lubricant for the job.
2. Keep it clean.
3. Keep it cool.
4. Keep it dry.

Simple in theory, challenging in practice. Bently Nevada can help you succeed with an unmatched scope of capabilities ranging from:

- Lubrication surveys
- Powerful software to manage your lubricant analysis data
- Resources to outsource your entire lubrication management or asset care program

You can trust our total solutions capabilities to keep it “clean, cool, and dry.” ☺
